

## Benchtop Tube Straightener

### New Methods Reduce Waste

The TS-2 Tube Straightener allows a single installer to straighten heavy wall stainless steel coiled tubing for use in above and below ground applications. The lightweight (60 lbs.) straightener comes with all necessary tools and mounts on a bench top, tail gate or any similar surface. Using coiled tubing allows installers to run continuous lines of seamless tubing without fittings or welding. The tube straightener allows installers to straighten exactly what they need, reducing waste and connections. The straightener comes with three sets of dies for 1/4, 3/8, and 1/2 in. tubing. Changing tubing sizes is easy. The dies can be changed over in minutes with no additional adjustment to the bender.

### Features

- Reduces waste and saves time by allowing installers to straighten exactly what they need.
- Fast. Set up and pull tubing in minutes.
- Easy to use. One person can pull even heavy walled 1/2 in. tubing.
- Straightens 1/4 to 1/2 in. heavy walled tubing for above grade or below grade installation.
- Easy change over from one size to another. Just change out the rollers. No special tools or adjustments required.
- Durable carrying case contains everything necessary to straighten tubing.

### BENEFITS

- Reduces waste
- Easy to use
- Fast setup and change overs
- No adjustments required
- Straightens 1/4, 3/8 and 1/2 tubing including heavy wall tubing
