

Pulling 3/4 in. Stainless Steel Coiled Tubing

Features

The CNG Plus Puller Swivel allows installers and maintenance teams to pull 3/4 in. coiled tubing through new and existing chases.

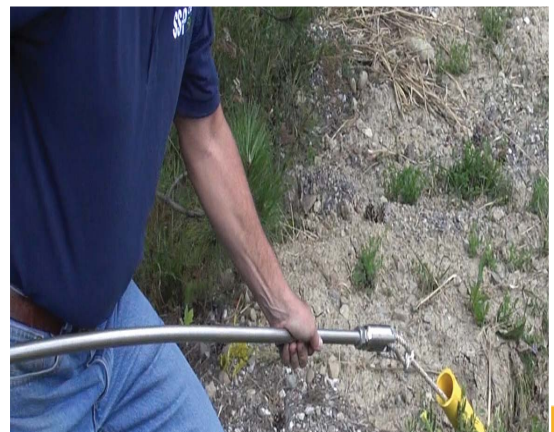

The CNG Plus Puller Swivel connects tubing to rope or cable used to pull tubing through new or existing chases. The Swivel Puller is designed to be used with 2 in. MDPE gas pipe with large radius bends.

Installation Methods

Using the CNG Plus Puller Swivel is easy.

1. Fish the rope or cable through the chase.
2. Swage the Puller Swivel to the end of the tubing.
3. Connect a rope or a cable to the Puller Swivel.
4. Pull the tubing through the chase. Depending on the length and design of the chase, installers may use a vehicle or cable puller.
5. Cap the tubing at both ends to prevent dirt and moisture from entering the system.

BENEFITS

- Fast installation of 3/4 in 5500 psig coiled stainless steel tubing.
